SPLAT!

The fun physics and engineering session that enabled children and adults to build catapults and catapult rotten fruit and veg through the air to learn about gravity, push, pull, air resistance, impact and energy dispersal. Aimed at children age 6 and adults of all ages!

Engaged

Schools/Groups: 11

Teachers/Adults: 23

Children: 125

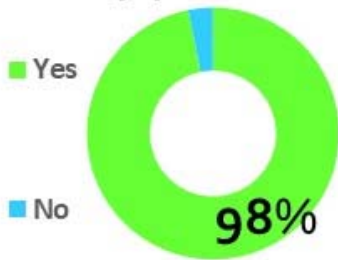

Volunteers: 3

WILD ELEMENTS**

Favourite Activities

Making catapults, throwing fruit and veg, egg parachutes, water balloons, "Learning about different forces, the egg dropping experiment, building and firing the catapults" and "The other children"

Many children want to know about gravity, forces, velocity and "More science"
"Newton's other laws"
"Everything about science"

"I loved today and I learned about forces"

"Fun, learnt that science is in everything"

What is the best thing about Wild Elements?

- "The people running the course were nice and understanding of different needs and engaging with kids"
- **"They do cool home ed things"**
- "They were a great team who made the day fun and educational"
- **"You make us enjoy nature"**
- "They make boring things fun"
- **"They are great teachers"**

"Very educating and entertaining learning science and physics"

"I loved today and I learned about physics"

"It was a great day we learnt about forces, projectiles/ trajectories + complementation on part of a team"
